Nursing Diagnosis	Goals	Nursing Interventions	Expected Outcomes	Goals Attained Evaluation
Nursing Diagnosis Ineffective airway clearance associated with chronic inflammation causing bronchoconstriction and excessive mucus production.	Goals The student will increase his/her ability to identify and manage environmental triggers. The student will increase his/her knowledge about asthma and skills in asthma self-management, including the importance of adherence to the Asthma Action Plan and IHP to avoid asthma episodes and possible long- term harm to airways.	Nursing Interventions Obtain an Asthma Action Plan from the parents/guardians and the healthcare provider. Identify the student's level of asthma severity by monitoring asthma signs and symptoms to help in establishing priority for intervention. Educate the student about: -characteristics of good control of asthma; -early recognition of signs and symptoms of an asthma exacerbation, and actions to take to manage asthma symptoms; -student's asthma triggers and specific strategies to avoid or control exposure to triggers;	Expected Outcomes The student will have an Asthma Action Plan on file in the school health office to be used in developing an IHP and ECP. The student will identify symptoms of asthma. The student will identify early indications of an asthma exacerbation. The student will identify his/her asthma triggers and list strategies for how to avoid these or how to control exposure to them. The student will periodically review with the school nurse and parent effectiveness of his/her asthma management.	Goals Attained Evaluation Not Attained: In Process: Goal Attained:
